## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 08/29/2005 has been entered.

### ***Examiner's Amendment***

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. Claim 23, step (d), "forming a gate insulation layer" has been changed to  
"forming a first gate insulation layer"; and  
Claim 23, step (e), "forming a gate insulation layer" has been changed to  
"forming a second gate insulation layer"

(So as to provide antecedent bases for the first gate insulation layer and the second gate insulation layer in step (f) ).

*Allowable Subject Matter*

4. Claim 23 is allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or render obvious a manufacturing method of a semiconductor device comprising all limitations as recited in claim 23, characterized in (d) forming a first gate insulation layer of the heavy insulated transistor in a forming region for the heavy insulated transistor by patterning the insulation layer formed in (b) to a predetermined shape, and removing the insulation layer in forming regions for the light insulated transistor and the resistive impurity layer; (e) forming a second gate insulation layer of the light insulated transistor in the forming region for the light insulated transistor; and (g) forming a source/drain region of the heavy insulated transistor and the light insulated transistor by doping a second impurity, as well as forming a contact impurity layer in a region, continuously connected to the resistive impurity layer formed in (c), and providing a second impurity-doping forbidden region in the element isolation region at the same time, while providing a second impurity-doping region in the active region in the forming region for the resistive impurity layer and a second impurity-doping forbidden region in the element isolation region.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
